Kaushik set this channel to be automatically shown in the channels list.
Kaushik changed channel name from Data Science to 2. Data Science.
Kaushik Yesterday 6:50 PM
Data science is an interdisciplinary field that uses scientific methods, processes, algorithms and systems to extract knowledge and insights from many structural and unstructured data.[1][2] Data science is related to data mining, deep learning and big data.
Data science is a "concept to unify statistics, data analysis, machine learning, domain knowledge and their related methods" in order to "understand and analyze actual phenomena" with data.[3] It uses techniques and theories drawn from many fields within the context of mathematics, statistics, computer science, and information science.

Languages[edit]
Python is a programming language with simple syntax that is commonly used for data science.[11] There are a number of python libraries that are used in data science including numpy, pandas and scipy.
R is a programming language that was designed for statisticians and data mining[12] and is optimized for computation.
